DECCO

**WOODEN REELS AND INDUSTRIAL
PACKAGING**

Background

DECCO is the leading company in Latin America in the production of wooden railroad ties.

We are suppliers to all railroads and track contractors in Mexico.

Products

Wooden Ties

Crossties and switch ties for the railroad industry.

Poles

Robust wooden structures used in electrical systems, telecommunications, and fencing.

Packaging

Essential elements for the storage and transportation of industrial cables, wires, and hoses.

Wooden Reels

With 32 years of experience in producing railroad ties and wooden poles, and leveraging our supplier network and purchasing volume,  DECCC developed a new wood packaging production line, including our first line of cable reels.

- Heat treatment stamp
- Official documentation
- Automated production
- Consistent quality and punctuality
- Industrial experience and infrastructure

Facility and Product

Our production is based in Durango, where we launched an automated line with state-of-the-art technology to produce reels with consistent quality and marking. We manufacture reels ranging from 40 cm to 1250 cm in flange diameter, all bearing our heat treatment stamp and official documentation verifying the legal origin of the wood—requirements essential for export.

Our Goal

To be the trusted manufacturer of wooden packaging for the industry, including cable reels, crates, and custom solutions.

We integrate with our clients' production programs to ensure constant availability, on-time deliveries, and products with uniform quality and markings—offering safe and efficient protection for transporting heavy and delicate goods.

> Custom Design

> Optimal Quality

> Competitive Pricing

Benefits for Our Clients

Damage Reduction

Logistic Efficiency

Cost-Benefit

Sustainability

 **DECCC** is known for its extensive experience of over 35 years in the wood industry, offering products of the highest quality.

Our personalized service ensures designs adapted to the specific needs of each client, backed by a robust infrastructure that enables us to handle large-volume orders with competitive lead times.

This combination of experience, tailored service, and production efficiency positions us as market leaders.
